

Utimaco SafeGuard Enterprise Promotion CrypToken

A.E.T. Europe B.V. (AET) is a leading global supplier of strong authentication solutions. Our **SafeSign Identity Client (IC)** software integrated with smart cards and USB tokens supports the use of digital certificates. SafeSign IC is the leading smart card/USB Token middleware available today. It is **included in the SafeGuard Enterprise license** and has been sold to many customers all around the world.

SafeGuard Enterprise supports the use of smart cards and tokens in Power On Authentication and as authentication for the Management Center. With SafeSign Identity Client middleware you can use more than 70 different smart cards and tokens with SafeGuard Enterprise, but also to logon to other applications, like terminal services, web servers, etc..

AET likes to offer SafeGuard Enterprise users as well as resellers / distributors the opportunity to use,

supply and support strong authentication with smart cards and USB Tokens leveraging the SafeSign IC software.

SafeSign IC offers you:

Multiple OS support

Support for Windows - including Vista (32 bits)-, Linux and Mac OS X.

Multiple language support

SafeSign IC supports multiple languages including Japanese, French, English and Chinese.

Marx CrypToken

The latest USB token supported by SafeSign IC is the **Marx CrypToken** USB token. This token supports a couple of unique features compared to other USB tokens.

CCID compatible

The CrypToken supports CCID. This ensures correct operation on all platforms, as well as independence of (additional) reader drivers, as the operating system can directly access

the token. This makes problems caused by the lack of drivers for a particular platform something of the past.

Java Card 2.2 smart card operating system on-board

Powerful JCOP Java Card operating system, offering RSA 2048 bit key support.

72 Kbyte of EEPROM

Largest amount of EEPROM available on a USB token.

Made of STEEL

The Marx USB token is made of STEEL instead of plastic. The metal designer case shields against radiation, external interception, dust and water.

Smallest token on the market

It is the smallest USB token on the market available today allowing end users to easily include the Marx USB token on their key ring.

Certification

Certified according to Common Criteria.

Promotion pricing: We are able to offer special bundle prices for our products:

No of licenses	Marx CrypToken JCOP41)
10 to 49	€ 39,00
